[WHAT WE DO](#) | [HOW WE DO IT](#) | [WHO WE ARE](#)

Standard Textile is the only company in the U.S. with an in-house Research & Development Department dedicated exclusively to creating high-performance textiles and apparel for the healthcare and hospitality markets.

This commitment to research and development has resulted in more than 80 U.S. and international patents.

Our Product Technology & Development Center further demonstrates our focus on breakthrough innovation. This world-class facility fosters an environment where our textile engineers create new concepts and technologies at an unparalleled pace.

Our dedicated innovation teams tap these resources to partner with customers in designing and developing the industry's most value-engineered products.

**ENGINEERING

SOLUTIONS.**

PUTTING MORE RESOURCES AT YOUR SERVICE.

Standard Textile is the only vertically integrated textile company serving the healthcare community. Full control over the entire supply chain enables us to ensure superior value, consistent quality and on-time delivery for you.

Supply chain control also provides an opportunity to innovate at every stage

SAVING YOU
TIME, MONEY
AND WORRY.

REDUCING LAUNDRY AND LINEN COSTS.

We don't just supply the world's most innovative healthcare textile products. We also help our customers use them in the most efficient way.

Our dedicated team of textile, laundry and clinical experts work together to analyze every aspect of your laundry/linen chain and recommend process improvements that significantly reduce your total linen system costs—all while maintaining the highest level of patient care and cost accountability. We provide much more than the hardware and software. We provide the experts who guide you through the process.

Our state-of-the-art linen management tools include:

ControlTex[®] TMS[®]

A sophisticated web-based software application you can use to monitor and manage linen usage, inventory, distribution and associated costs.

ControlTex[®] LBS[®]

This business management software for laundry systems automates customer billing, piece and poundage tracking, productivity measures, preventive maintenance and order/production planning.

SurgiTex[™] Reusable Surgical Textile Solutions

INNOVATIONS

Centium Core Technology®

Centium Core Technology® is a patented weaving process available exclusively in terry, sheeting and blanket products manufactured by Standard Textile.

This process utilizes proprietary Optimized Polymer Performance Enhancement engineering to significantly improve product tensile strength, extend service life and enhance performance. **You get superior, longer lasting products that deliver both incredible comfort and lower cost-per-use.**

The Cotton surface is woven around the Centium Core for a unique construction that enhances comfort, increases strength and extends product life.

Healing Spaces®

Textiles play an important role in healthcare environments. The softness of a robe, the warmth of a blanket, the beauty of a window treatment—these tactile and visual experiences can comfort and calm during times of great stress.

Healing Spaces® by Standard Textile is an integrated, coordinated, comprehensive approach to creating a room that soothes and relaxes your patients and their visitors. This collection of bedding, apparel, decorative products and terry has its origins in the unparalleled luxury and elegance of our award-winning hospitality line. At the same time, our products deliver superior efficiency and value for your operation.

Everything works together aesthetically and functionally to create a space that says to the patient, “your comfort matters.”

INNOVATIONS

Impact Technology®

Our exclusive Impact Technology® assists you in maintaining the safest possible environment for your patients and your workers. Impact Technology® embeds its protection within the fibers of the fabric. It makes our privacy curtains and top-of-the-bed fabrics resistant to flames, stains, splashes, and microbial growth.

Impact Technology® leverages Aegis® Microbe Shield on our solid fabrics and Alta™ on our patterned fabrics. Broad-spectrum antimicrobial protection inhibits the growth of odor- and stain-causing bacteria, fungi, algae, and yeasts. Impact Technology® has been tested against representative gram-positive and gram-negative organisms to 50 industrial wash cycles, certified by an independent testing agency.

Impact Technology® can be applied to any fabric.

Founded in 1940, Standard Textile has developed a culture of innovation, quality and service. With more than 80 patents, our products are engineered to deliver durability, longevity and value. We go far beyond just providing on-time, quality products to our clients. We partner with you to drive out excess operational costs from your laundry and linen system.

COMPANY OVERVIEW

CORPORATE RESPONSIBILITY

Environmental issues are increasingly shaping the context of our business. The cost, availability, utilization, and management of energy and water, and the use of chemistry in the manufacturing and processing of our products have implications for operations throughout the value chain—from the raw material through the end user.

In response, we've developed a culture of sustainability within our company. We are continuously developing new ways to help our company and our customers reduce environmental impact. From sustainable supply chain programs to eco-friendly
